utopia MASTER CLASS

Claude Code Codex

Put AI to Work

A hands-on masterclass that teaches your staff to use and build AI in their own daily work — taught by the operators who run it every day.

utopia

One day or two.
That is the whole programme.

The 1-Day class takes a team from zero to a working automation. The 2-Day class adds a full day of building real tools.

1-DAY COMPRESSED MASTERCLASS

The AI Power Day

Zero to a working automation in one day. For the people who must use AI on Monday.

Watch, set up, build, keep:

- **Meet Your New Workforce** — The latest tools, in plain words
- **Never Touch a Browser Again** — Claude in Chrome does the clicking
- **The Right Setup from Day One** — We set you up to skip the mistakes
- **Now You Build** — Your first automation, live today

from RM8,400

1 day · 8 hours · Private up to 5 · Team up to 10

2-DAY DEEP DIVE

The AI Builder Intensive

For the person who will build and run AI in your company.

Everything in Day 1, plus:

- **The WhatsApp Employee** — Your company bot, built live
- **AI in Your Pocket** — Build from your phone, anywhere
- **The Data Harvester** — Scrapers for the daily grunt work
- **Picture, Video and Content** — Generated, and kept on-brand

from RM12,800

2 days · 16 hours · Private up to 5 · Team up to 10

INCLUDED IN BOTH

- **Your office or ours** — Sunway Putra Tower, or we come to you
- **Accounts + tokens** — Set up and paid for, everyone
- **Lifetime resource group** — New tools, shared as we find them
- **3-month group Q&A** — For questions after the class

utopia

Your staff, before and after.

They build in-house automation that cuts time spent on manual tasks — teams lift their output 3–4× within a month.

	BEFORE	AFTER THE CLASS
Daily work	Repetitive tasks, done by hand.	✓ **An automation runs them — checked, then trusted.**
Building tools	Waits for IT or an agency.	✓ **Builds it themselves, the same day.**
Using AI	Types questions into a chatbot.	✓ **Operates Claude Code and Codex like a pro.**
Team knowledge	Stays in one person's head.	✓ **Playbooks and templates the whole team keeps.**

Hours back, every week
The repeated work runs itself

A builder's skillset
Not prompts — working tools

Tools that keep working
Set up on their own machines

Confidence with AI
They know what it can and cannot do

Automation that works in your company.

They learn to build automation your business actually runs — automating operations, increasing efficiency, and reducing headcount costs.

What your staff get back.

They can start from zero — nothing installed, never used AI beyond a chatbot. One class later, what they do looks like magic.

DAY 0

Knows nothing yet

Nothing set up, no experience. Curious, but stuck watching others use AI.

→

IN CLASS

Builds for real

Sets up their own machine and builds a working automation, trainer beside them.

→

AFTER

Does magic

Automates their own work, builds new tools, and shows teammates how.

SKILLS THAT TRANSFER TO EVERY JOB THEY TOUCH

Thinking in automations
They spot repeated work and remove it

Working with AI agents
Any tool, not one app — the skill carries

Checking AI like a pro
Trust it, but verify before it ships

Teaching it onward
They train the next person themselves

Taught by actual AI operators who run payroll and operations for **380 active staff across 18 payroll companies** — not lecturers.

Watch it. Build it. Take it home.

Every module runs the same way — nobody sits through a lecture.

Watch it built live

A real automation, end to end, in front of you.

Build it yourself

The same build, on your own task, trainer beside you.

Take it home

Templates, the resource group, the follow-up visit.

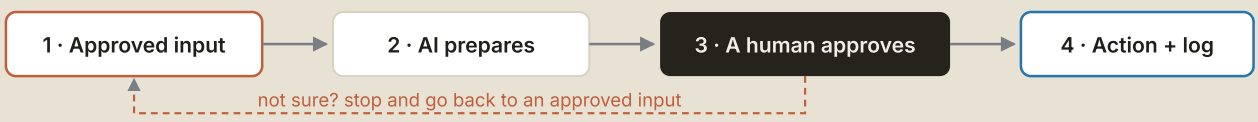

AI prepares. A human approves. The system records.

The safety rule drilled into every exercise. Approval is mandatory before anything leaves the desk — sends, payments, publishing, deletions.

Your IT owner stays in charge

Before the day starts, your IT owner decides what the tools may read and change. Sensitive HR and customer data is excluded unless you specifically approve it; synthetic samples are the fallback.

THE SHAPE OF EVERY WORKFLOW BUILT IN CLASS

Day 1: from zero to your first working automation.

No AI experience assumed | 8 hours | Private 5 · Team 10 pax | EN / BM | Accounts + tokens provided

01
Meet Your New Workforce
The tools that matter, explained simply — refreshed to the latest on the day you attend. Tools change; we keep up.

02
Never Touch a Browser or Excel Again
The Claude Chrome plugin does the clicking, filling and copying on the pages you already use.

03
The Right Setup from Day One
A year of building with AI taught us every mistake. We set you up so you never make them.

04
View Real Automations
We show you all the use cases — real automations from our own company, end to end.

05
Now You Build
Hands-on. Your first working automation, on a task you actually repeat — today.

06
Build Like a Pro
Skills, methods and flow: the techniques behind consistently good results.

HOW THE DAY RUNS · INDICATIVE

09:00	Meet Your New Workforce — the latest tools, in plain language
09:45	Never Touch a Browser or Excel Again — Claude in Chrome
11:00	The Right Setup from Day One — Claude Code and Codex, done right
14:00	View Real Automations — all the use cases, live
14:45	Now You Build — your own task, your own automation
16:30	Build Like a Pro — skills, methods and flow
17:30	Your automation, finished and checked

Runs 9:00–18:00 — 8 training hours; a 45-minute lunch and two short breaks not shown · ≥75% attendance required for HRD Corp claims.

Day 2: build the tools your business will actually run.

Includes everything in Day 1 | 8 hours | Private 5 · Team 10 pax | Accounts + tokens provided

01
Overnight Questions, Morning Answers
Everything Day 1 raised, worked through on your own builds.

02
Beyond the Basics
Advanced Claude Code: the operator's toolkit for bigger, safer builds.

03
The WhatsApp Employee
Your company's WhatsApp bot, built live — replies, reminders, follow-ups.

04
AI in Your Pocket
Run and steer your builds from your phone, from anywhere.

05
The Data Harvester
Scrapers that do the daily grunt work: pulling, checking, compiling.

06
Picture, Video and Content
Generation that stays on-brand — the best practices we use ourselves.

HOW THE DAY RUNS · INDICATIVE

09:00	Overnight Questions, Morning Answers — on your own builds
09:45	Beyond the Basics — advanced Claude Code
11:00	The WhatsApp Employee — build the bot
14:00	AI in Your Pocket — build from your phone
15:00	The Data Harvester — your first scraper
16:15	Picture, Video and Content — done right
17:30	Your bot, live and checked

Runs 9:00–18:00 — 8 training hours; a 45-minute lunch and two short breaks not shown. Team caps at ten so the trainer can still sit with every participant while they build.

The four questions your management will ask first.

Will AI send something wrong to a customer?

No — because it never sends. A named person approves every outgoing message, payment and change. That rule is drilled all day, in every class.

Is our company data safe?

Your IT owner decides what the tools may read and change before the day starts. Sensitive HR and customer data is excluded unless you specifically approve it. Synthetic samples are the fallback.

Will my staff actually use it after?

That is what the follow-up visit and the 3-month Q&A group are for. We come to your office, look at what they have really been doing, and share the next build.

Do we need technical people?

No. Day 1 is built for operators, not engineers — we bring the accounts and set the tools up with you. Day 2 goes deeper, but it is still hands-on for non-technical staff.

Data handling, redaction, retention and connector permissions remain owned by your IT team throughout.

utopia

An investment that pays back in a few months.

WHAT YOU GET	1-DAY COMPRESSED MASTERCLASS **The AI Power Day** Private — up to 5 pax **RM8,400** Team — up to 10 pax **RM10,200**	2-DAY DEEP DIVE **The AI Builder Intensive** Private — up to 5 pax **RM12,800** Team — up to 10 pax **RM14,800**
The full Day-1 curriculum — six hands-on modules	✓	✓
Day 2 — a full day of advanced builds	×	✓
The WhatsApp Employee — your company bot, live	×	✓
Build anywhere — run it from your phone	×	✓
Scrapers, picture, video and content generation	×	✓

Your office or ours	✓	✓

RM2,500
PER VISIT · 4 HOURS

Add-on: the follow-up visit — we come to you

Four hours at your office, unlimited attendees. Their questions, the next build, and how to improve what they have already shipped.

You provide **one laptop per participant** — that is the whole prerequisite. We provide everything else.

Fees in Malaysian Ringgit per class. Private prices sit within HRD Corp's in-house course-fee limits from 4 participants, Team prices from 5; claimability remains subject to submission by your registered training provider and grant approval.

Start with one team.
Decide the rest afterwards.

Pick one department. Run one day — or two. Look at the work that comes back before committing to anything else.

1

Pick your class

The AI Power Day (1 day), or The AI Builder Intensive (2 days).

2

Pick your room

Private (up to 5) or Team (up to 10). Your office or ours.

3

Book the follow-up visit

Four hours at your office, on the work they actually did.

Tap or scan to WhatsApp "CLASS" + department + participant count + preferred month.

The AI Power Day
1 day · from **RM8,400**

The AI Builder Intensive
2 days · from **RM12,800**

The follow-up visit
4 hours at your office · **RM2,500**
